Directors' Report

We are pleased to present the unconsolidated and consolidated condensed interim financial statements of JS Bank Limited ("JSBL") for the guarter ended March 31, 2025.

Economy and Banking Sector Review

Pakistan's key macroeconomic indicators remained largely stable during the first quarter of CY25. Headline CPI inflation reached a six-decade low of 0.7% in March 2025, bringing the average inflation for the quarter down to 1.5%, compared to 24% in the same period last year. This sharp decline was primarily driven by easing food and energy prices. Fiscal consolidation measures yielded tangible results, leading to a primary surplus and a narrowed fiscal deficit. On the external front, the current account recorded a cumulative surplus of US\$691 million during 8MFY25, supported by a 33% YoY increase in workers' remittances. Exports rose by 8.4% while imports increased by 7.6% YoY during the same period. Investors' confidence continues to strengthen, as reflected in the bullish performance of the Pakistan Stock Exchange. These positive developments lay the foundation for sustained growth and moderate inflation in the coming months.

The State Bank of Pakistan (SBP) paused its monetary easing cycle in March 2025, following a 100 basis points (bps) rate cut in January 2025. The policy rate now stands at 12%, down significantly from 22% in March 2024.

In a significant development, the IMF staff and Pakistani authorities reached a Staff-Level Agreement (SLA) on the first review under the US\$7bn Extended Fund Facility (EFF), as well as a new 28-month Resilience and Sustainability Facility (RSF), granting total access of US\$2.3billion. Pakistan remains committed to following structural reforms and requirements set by the IMF, including energy sector reforms, approval of agricultural income tax at provincial levels, and privatization of state-owned enterprises, including DISCOs and the national airline.

In a recent development in April 2025, Pakistan's sovereign credit rating was raised to Bfrom CCC+ by Fitch Ratings, which points to stronger fiscal discipline, a more stable external account, and improved economic governance, and the outlook assigned was stable. The move reflects growing confidence in Pakistan's ability to sustain tighter budget controls and implement reforms under its ongoing International Monetary Fund (IMF) programme.

Pakistan's banking sector has entered a new phase shaped by swift monetary easing, with the State Bank of Pakistan (SBP) reducing the policy rate by a cumulative 1,000 bps since March 2024. With interest rates on a downward trajectory, banks are expected to witness margin compression as the high-yielding asset base begins to reprice at lower levels. This is expected to weigh on core profitability metrics. NIM contraction is likely to be more pronounced in banks with a shorter asset duration or higher exposure to floating-rate lending. Advances can be expected to pick up as a result of financing now available at reduced rates following the reduction in policy rate. Capital adequacy ratios in the sector remain strong and well above regulatory requirements.

Overview of the Bank's Performance

For the first quarter ended March 31, 2025, the Bank reported a Profit Before Tax of PKR 2,738 million (Profit after Tax of PKR 1,289 million), as compared to a Profit before Tax of PKR 3,743 million (Profit after Tax of PKR 1,718 million) earned during the corresponding period last year.

Directors' Report

Period end deposits at March 31, 2025, increased to PKR 534.3 billion, growing by 4% year on year. At the same time, period end non-remunerative deposits grew by 11%, as the non-remunerative mix improved to PKR 179.9 billion at March 31, 2025 as against PKR 162.7 billion at March 31, 2024. This increase is testimony to the confidence and trust reposed in the Bank by its valued customers and the dedicated efforts of our teams to improve the deposit mix.

In terms of overall revenue, the Bank maintained a relatively stable trajectory year on year, earning PKR 10,610 million for the first quarter of 2025, as against PKR 10,812 million earned last year. This is despite the fact that the Bank had realized relatively higher Foreign Exchange Income, coupled with gains on sale of government securities as part of its non mark-up income during the comparative prior period. Overall non mark-up income for the current period was reported at PKR 3,179 million, lower by 14% against the corresponding prior period. However, this decrease in non mark-up income was largely offset by improved Net Interest Income, which was reported at PKR 7,431 million for the current quarter, up 5% year on year. Despite a significant reduction in interest rates as against the comparative prior period, the Bank was able to improve its overall Net interest income year on year, primarily through improvement in the deposit mix, as non-remunerative deposit averages improved from PKR 152.3 Bn in Q1'24 to PKR 174.1 Bn in Q1'25 (YoY growth of ~14%).

Operating expenses increased by 13%YoY, primarily driven by higher staff costs and enhanced investment in Information technology - reflecting the Bank's continued focus on strengthening its human capital and digital capabilities. The Bank's cost-to-income ratio improved to 67% as compared to 71% for the year ended December 31, 2024.

With a reduction in Gross Advances of 13% as against the year ended December 31, 2024 position, the Bank's NPL ratio inched up to 10.02%. However, the Bank's NPL Coverage Ratio improved to 72.4% (December 31, 2024: 70.7%), with overall coverage now at 76.4 percent. The Bank's Capital Adequacy Ratio as at March 31, 2025, has been reported at 13.15% (December 31, 2024: 13.24%), mainly due to shift in Risk Weighted Assets.

Key highlights of the financial results of the Bank for the quarter ended March 31, 2025, are presented below:

37 FAIR VALUE MEASUREMENTS

The fair value of quoted securities other than those classified as amortised cost, is based on quoted market price. Quoted securities classified as amortised cost are carried at cost. The fair value of unquoted equity securities, other than investments in associates and subsidiaries, is determined on the basis of valuation methodologies. The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

37.1 Fair value of financial instruments

The Bank measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fairvalue measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyses financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by market transactions involving identical or comparable or similar properties. These values are adjusted to reflect the current condition of the properties.

statements of the Bank and its subsidiary companies together - the Group.

Control exists when the Group is exposed, or has rights, to variable returns from its investment with investee and has the ability to effect those return through its power over the investee, except investment in mutual funds established under trust structure where International Financial Reporting Standard (IFRS) 10, 'Consolidated Financial Statements' is not applicable.
- These consolidated condensed interim financial statements incorporate the financial statements of subsidiaries from the date that control commences until the date that control ceases.
- The financial statements of the subsidiary companies are prepared for the same reporting year as the holding company for the purpose of consolidation, using consistent accounting policies.
- The assets, liabilities, income and expenses of subsidiary companies have been consolidated on a line by line basis.
- Non-controlling interests are that part of the net results of operations and of net assets of subsidiaries attributable to interest which are not owned by the Bank.
- Material intra-group balances and transactions are eliminated.

2.3 Standards, interpretations of and amendments to approved accounting standards that are effective in the current period

There are certain new and amended standards, interpretations and amendments that are mandatory for the Group's accounting periods beginning on January 01, 2025 but are considered not to be relevant or do not have any significant effect on the Group's operations.

37 FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of quoted securities other than those classified as amortised cost, is based on quoted market price. Quoted securities classified as amortised cost are carried at cost. The fair value of unquoted equity securities, other than investments in associates, is determined on the basis of valuation methodologies. The fair value of unquoted debt securities, fixed term loans, other assets, other liabilities and fixed term deposits cannot be calculated with sufficient reliability due to absence of current and active market for assets and liabilities and reliable data regarding market rates for similar instruments.

37.1 Fair value of financial instruments

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurements using input for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

The table below analyzes financial instruments measured at the end of the reporting period by the level in the fair value hierarchy into which the fair value measurement is categorised:

The valuations are conducted by the valuation experts appointed by the Bank which are also on the panel of State Bank of Pakistan. The valuation experts
	used a market based approach to arrive at the fair value of the Bank's properties. The market approach used prices and other relevant information generated by market transactions involving identical or comparable or similar properties. These values are adjusted to reflect the current condition of the properties. The effect of changes in the unobservable inputs used in the valuations cannot be determined with certainty, accordingly a qualitative disclosure of sensitivity has not been presented in these consolidated financial statements.
